

# Swim-Lift® Series Assisted Access

## Gallatin

The Gallatin is the most versatile ADA compliant Swim-Lift® of the assisted access devices. This fully self-operated device is the first of its kind to accommodate both in-ground pools and spas without unnecessary customization. The Gallatin requires no more than 12-inches of total depth (deck to floor/bench) for proper installation and the standard unit will accommodate anchor locations of 20 1/2 to 30-inches from the pool wall thanks to its adjustable base stand.

The Gallatin is not only the most versatile lift in the aquatics industry, it's also the most proven. Supported by certified load and seismic calculations, the Gallatin is designed to lift a 400-pound load with only 55 psi of water pressure. That, combined with the Gallatin's patented pressure foot support structure and dual deck attachments, give it the strength and stability that have made it the standard to which all others are compared. Don't accept cheap imitations; demand the very best and the proof that supports it!

Anchor assembly and accessories sold separately. Field measurements required.

### ADA Compliant

The Gallatin, Pintlar and Lolo complies with the requirements of the U. S. Architectural and Transportation Barriers Compliance Board, Architectural Barriers Act of 1968, Section 502 of the Rehabilitation Act of 1973, Section 504 of the Americans with Disabilities Act of 1990, and the Accessibility Guidelines for Recreation Facilities of September 3, 2002.

The lift, based on the recommendations of the ADA, exceeds the minimum load capacity as stated in the guidelines and therefore shall support a 400-pound load with a 1.5 safety factor.

**Ask for the Lifting Load and Seismic Load engineering calculations.**

**400-pound  
Lifting Capacity**

4 1/2-inch stainless steel cylinder lifts 400 lbs. at 55 psi. Strongest lift system available.

Seat rotates a full 180° while edge of seat is at least 25-inch inside of deck edge.

Operating lever adjacent to seat in all positions.

Flip-up outer arm and seat belt provides extra safety.

Pull-out leg rest.

Dual anchor points with transport wheels are standard.

Patented pressure foot.

**The most versatile lift!**
